That makes things easier, I can redact sensitive facility data provided by Maryland that may be referenced in the report. Please confirm there are no ERI trade secrets and commercial or financial information contained in ERI/NRC 16-203.

We have treated all the facility data as "proprietary", and I am not in a position to decide which data are or are not "proprietary."

Therefore, if you do not think the Univ. Maryland RTR data is not "proprietary," I will change the entire report as such. May be Maryland people can decide (it is up to you).

I do not need all the files that were in the email. I would need a non- version of the final deliverable ERI/NRC 16-203, Contract No. NRC-HQ-25-14-E-0005 (Task Order 8) for ADAMS or a redacted version removing the proprietary components and a separate explanation of why the redacted portions are proprietary.

Eben:

Morgan told me that you would like us to remove "Proprietary" from the attached files and then resend you the files. Please confirm and we will proceed to do so.

Thanks,

Mohsen

The attached is Maryland's TH report, as I had said on the phone the ADAMS folks are having problems entering because its marked proprietary.

MKR can send you a non-prop version as long as we know which document is of concern (letter report, calc note,?). Please specify and send to him.

It would be best to that next week or the week after.

On a different topic, have you discussed with Mohsen what portions of the Maryland report are proprietary?
