REVISION HISTORY

Revision	Page	Description
A	All	First Issue. RAI and AI responses submitted until August 31, 2015 are included.
B	All	Including the following information; 1. RAI and AI responses submitted from September 1 to December 31, 2015 2. Editorial corrections or minor changes identified by Self-Assessment

This document was prepared for the design certification application to the U.S. Nuclear Regulatory Commission and contains technological information that constitutes intellectual property.

Copying, using, or distributing the information in this document in whole or in part is permitted only by the U.S. Nuclear Regulatory Commission and its contractors for the purpose of reviewing design certification application materials. Other uses are strictly prohibited without written permission of Korea Electric Power Corporation and Korea Hydro & Nuclear Power Co., Ltd.

General Description

This report includes a table that identifies the impact of each response to the Request for Additional Information (“RAI”) and Action Item (“AI”), and editorial corrections/minor changes by Self-Assessment relative to Design Control Document (“DCD”) Revision 0 of APR1400. This table denotes the RAI and AI responses that have been submitted from September 1, 2015 to December 31, 2015 and editorial corrections/minor changes identified by Self-Assessment that have been incorporated into this Tracking Report using yellow color cells.

With regard to this report, the APR1400 DCD change list (Rev. B) and working copy (Rev. B) were uploaded separately in the APR1400 Design Certification Electronic Reading Room. The APR1400 DCD change list identifies the change ID No., location, reason for change, and change summary of the changes impacted by the responses for each Chapter. All the changes have been marked up in the APR1400 DCD working copy (Rev. B) with the change ID No. of blue color to distinguish it from the change ID No. specified in the previous version.
