Re: 62 FR 3313-3314, January 22, 1997 (No. 14)
Docket No. 40-3453
License No. SUA-917

Pursuant Part 2, subpart G of the Commission's Rules of Procedure, Section 2.1205 notwithstanding, the undersigned, by way of response to the above referenced Federal Register Notice, hereby requests a formal hearing.

Contemplated NRC Staff licensing action is without factual or legal basis. The slippage which the applicant/licensee 961220 application however imperfectly documents is responsive to U.S. Nuclear Regulatory Commission (NRC), DWM-ONMSS, programmatic regulatory breakdown. Imperitia culpae adnumeratur Imperitia est maxima mechanicorum poena

The ammendment to SUA-917, as contemplated by the 961220 application, should not be issued.

The pertinent "factors" set out in 62 FR 3313-3314 are predominately adverse to the health and safety of the requestor and his family, who reside in the vicinity of the subject site.

Requestor will supplement this request promptly upon establishment of NRC Local Public Document Room at an appropriate office near the site at Moab, Grand County, Utah.

[Docket No. 40-8903]

Homestake Mining Company; Notice

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of licensee request to amend source material license.

SUMMARY: Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has received, by letter dated December 18, 1996, an application from Homestake Mining Company (HMC) to amend License Condition (LC) 36 of Source Material License No. SUA-1471 to

change certain reclamation milestone dates.

The license amendment application proposes to modify LC 36 to change the completion dates for two site reclamation milestones. The new dates proposed by HMC would extend completion of (1) placement of final radon barrier on the Large Tailings Pile (LTP) by seven years, (2) placement of erosion protection on the LTP by five years, (3) placement of final radon barrier on the Small Tailings Pile (STP) by eleven years, and (4) shorten completion of placement of erosion protection on the STP by one year. The application cites technical infeasibility as precluding completion in accordance with the present license dates due to incomplete settlement of the LTP and evaporation ponds associated with the groundwater corrective action program initiated on the STP.

FOR FURTHER INFORMATION CONTACT: Mr. Kenneth R. Hooks, Uranium Recovery Branch, Mail Stop TWFN 7-J9, Division of Waste Management, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Telephone 301/415-7777.

SUPPLEMENTARY INFORMATION: HMC's application to amend Condition 36 of Source Material License SUA-1471, which describes the proposed changes to the license condition and the reason for the request is being made available for public inspection at the Commission's Public Document Room at 2120 L Street, NW (Lower Level), Washington, DC.
