MEMORANDUM TO: Mark Tonacci, Chief
Licensing Branch 1
Division of New Reactor Licensing
Office of New Reactors

FROM: Demetrius Murray, Project Manager /RA/
Licensing Branch 1
Division of New Reactor Licensing
Office of New Reactors

SUBJECT: SUMMARY OF MAY 19, 2016, CLOSED MEETING WITH
NUSCALE POWER, REACTIVITY CONTROL DESIGN AND
LICENSING BASIS MEETING (TAC NO. RN6110)

On May 19, 2016, the staff from the U.S. Nuclear Regulatory Commission (NRC) and representatives from NuScale Power, LLC (NuScale) held a closed meeting at the NuScale Rockville office located at 11333 Woodglenn Drive, Suite 205, Rockville, Maryland 20852.

The purpose of the pre-application meeting was to establish the reactivity control capability of the NuScale design; NuScale provided a proprietary presentation describing reactivity control systems for the NuScale design, including protection and safety system functions being supported. The presentation also covered the manner in which the NuScale design will meet the intent of General Design Criteria (GDC) 26, 27, and 28 and will be addressed in appropriate sections of the final safety analysis report (FSAR).

The NuScale design and heat removal capability was discussed as well as the core design and its similarities to the proven US 17x17 PWR technology. NRC staff and NuScale discussed the Secondary Reactivity Control Systems Safety Classification; Rapid Shutdown and maintaining a shutdown condition; FSAR Implementation; and the areas needed to meet GDC 26 and GDC 27.

The meeting agenda and attendee list is included in Enclosure 1 and Enclosure 2. Please direct any inquiries to Gregory Cranston at (301) 415-0546, or email at Gregory.Cranston@nrc.gov or Demetrius Murray (301) 415-7646, or email at Demetrius.Murray@nrc.gov.
