

June 16, 2016

United States Nuclear Regulatory Commission  
Washington, DC 20555-0001

I am writing to request a transfer of our registration certificate NR-1323-D-101-E to "inactive" status per NUREG -1556, Volume 3, Revision 2, Section 13.4. At this time, this site has no intent to distribute these devices.

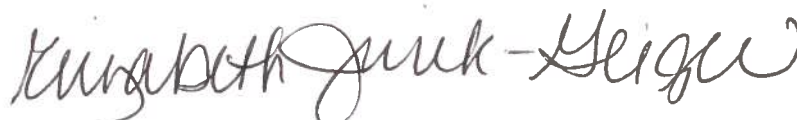

Total number of products sold = 0  
Total products still in use = 0

The site has not received nor distributed any sealed-source sights at any time in the past and does not plan to do so in the foreseeable future. Since no sights were distributed, product services will also be inactivated. Site management commits to not distributing the product commercially, and acknowledges that no changes were made to the product since its original registration certificate was issued.

The associated exempt distribution license for these devices is 42-23982-01E (Docket 030-38393). In accordance with 10 CFR 30.36, we are requesting termination of the license as well. Since no devices were received for distribution, there are no receipt, transfer or disposal records of any byproduct material. As such, there is no decommissioning plan is included with this notification.

Please feel free to contact me with any questions.

Regards,

Elizabeth Jurik-Geiger, CSP
