Subject: Request for Additional Information - Point Beach, Units 1 & 2 - License Amendment Request - Removal of Completed License Conditions and Change to the Ventilation Filter Testing Program - MF7352

By letter dated February 12, 2016 (Agencywide Document Access and Management System (ADAMS) Accession Numbers ML16043A217), NextEra Energy Point Beach, LLC (NextEra), the licensee for Point Beach Nuclear Plant (PBNP), Units 1 and 2, requested to revise the PBNP facility operating licenses and the Technical Specifications (TS). The proposed revisions would remove license conditions that have been completed and are no longer in effect and revise a charcoal testing criterion for the control room emergency filtration system. In order for our staff to complete the evaluation, following additional information is requested. Please arrange a teleconference with the NRC staff, if any further clarification is needed. If not, please provide your response on the docket within 30 days of the receipt of this email. Thanks

SRXB – RAI 1

The licensee states in its application that the EOPs were revised with instructions to maintain containment spray for two hours while on sump recirculation. With this EOP revision, the licensee proposes to remove the license condition from Amendment 240/Amendment 244, Emergency Operating Procedures, which states:

NextEra Energy Point Beach, LLC shall revise PBNP Emergency Operating Procedures (EOPs) to direct continued containment spray while on sump recirculation.

The NRC staff requests that the licensee confirm that the EOPs were revised to include instructions to maintain containment spray for two hours while on sump recirculation.
