

## SAFETY INSPECTION REPORT AND COMPLIANCE INSPECTION

## 1. LICENSEE/LOCATION INSPECTED:

Allen County Highway Department  
200 East Berry Street  
Fort Wayne, IN 46802

REPORT NUMBER(S) 2016-001

## 2. NRC/REGIONAL OFFICE

Region III  
U. S. Nuclear Regulatory Commission  
2443 Warrenville Road, Suite 210  
Lisle, IL 60532-4352

## 3. DOCKET NUMBER(S)

030-34634

## 4. LICENSE NUMBER(S)

13-32058-01

## 5. DATE(S) OF INSPECTION

June 14, 2016

## LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

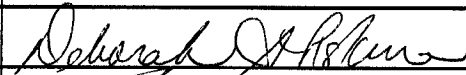

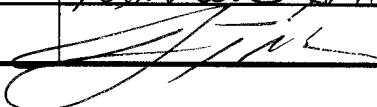

- ☒ 1. Based on the inspection findings, no violations were identified.
- ☐ 2. Previous violation(s) closed.
- ☐ 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise discretion, were satisfied.

Non-cited violation(s) were discussed involving the following requirement(s):

- ☐ 4. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.  
(Violations and Corrective Actions)

## Statement of Corrective Actions

I hereby state that, within 30 days, the actions described by me to the inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

**PROGRAM SCOPE**

This was a routine inspection of a county government engineering office. The licensee owned three portable gauges which were used for DOT road projects and other construction projects during the construction season. Five individuals were authorized to use the gauges. The licensee did not perform any service or maintenance activities on its gauges; these services were performed by the manufacturer or a licensed service firm. All gauge units were stored within a dedicated, locked cabinet in a locked storage room. Each unit was stored in its transport container with locks securing the shipping case; locks also secured the source control/exposure handle. Gauge users were issued the keys to the gauges from the RSO. Each gauge user must also complete the utilization log/sign-out sheet which informed the office of the exact job site where the device was used. The licensee specifically instructed the gauge users not to leave the device unattended while at a job site. Gauges were also required to be returned to the office upon completion of the shift. The gauges were last used in 2015 and the licensee intended to transfer its units, within the next few months, to the device manufacturer for disposal.

During this inspection, the inspector toured the storage area where the gauges were kept when not in use; performed radiation surveys around the devices; reviewed select records; and interviewed licensee personnel. At the time of this inspection, the gauges were not in use therefore, no field inspection was performed. The inspector reviewed disposal options and NRC license termination requirements with the RSO. No violations of NRC requirements were identified during this inspection.
