

Industry Program to Address Underground Pipe and Tank Assets

Mark Richter

Senior Project Manager-Nuclear Energy Institute

Public Meeting Between The Nuclear Regulatory Commission and Industry
Representatives To Discuss Buried and Underground Piping
September 20, 2016 – Rockville, MD

NUCLEAR ENERGY INSTITUTE

nuclear. clean air energy.

Program Status

- All operating plants have completed all implementation milestones.
- The Asset Management Plans capture future inspections and related activities for operating plants.
- Decommissioning plants' underground assets are managed through the decommissioning plan.

BPITF Status

- BPITF mission success:
 - Plant underground pipe and tank integrity programs are established.
 - Transition from milestone-based implementation to mature and effective engineering program.
 - Asset Management Plans will drive ongoing program activities in an enduring and committed fashion.

BPITF 2015 Final Actions

- Final revision of NEI 09-14 to capture interim guidance, future responsibilities, and other changes is complete.
- Transition from a milestone based initiative to programmatic management of underground assets is complete.
- The BPITF was sunset at the end of 2015.
- UPTI Program continues as an Engineering Program at the plants.
