**Subject:** Call to AREVA about AREVA's Reorganization  
**Date:** Tuesday, September 06, 2016 6:07:27 PM

---

On Friday September 2, 2016, I called Gayle Elliot from AREVA regarding AREVA's reorganization submittal. I asked about the following:

- The statement on page 3 of 7... AREVA Enrichment Services LLC (AES) which is to be renamed AREVA Nuclear Materials LLC... I asked is this simply a name change or is any restructuring occurring. Gayle said she would have to talk to David Royer about this before responding.
- The following names on page 7 of 7: AREVA NC Inc, PMC and Ur-Energy as they are not defined and are not listed in the organizations (org) charts provided. Also, as the org charts simply indicates licensee in several blocks, I asked that the specific license number be identified in each block in order to clearly see where each license will be held including each export license.

Finally, I indicated AREVA may wish to review Regulatory Issue Summary 2008-19, Lessons-Learned from Recent 10 CFR Part 70 License-Transfer Applications Reviews. I specifically pointed out the first, second, and fourth paragraphs on page 5 of 7 which call for proof that a new entity is incorporated, that all decommissioning financial assurance instruments be held in the name of the transferee's name before the license is transferred and financial statements for any company involved in a transfer showing the financial position of the company before and after the transfer.
