Subj: NOTIFICATION OF DECOMMISSIONING MILESTONE DATE CHANGES,  
CONTROL NUMBER 581662

The Navy's radioactive materials program is licensed with the U. S. Nuclear Regulatory Commission (NRC) under Master Materials License (MML) No. 45-23645-01NA. The NRC in letter Agencywide Documents Access and Management System Accession Number ML15294A293, dated 7 October 2015 approved the Navy's alternate schedule request for delays in: initiating decommissioning activities, the time frame for submitting a decommissioning plan, and completion of decommissioning activities for the Space and Naval Warfare Systems Center Pacific (SPAWAR) in San Diego, California.

This letter notifies the NRC of a projected 2.5 year delay in completing the historical radiological assessment (HRA) at SPAWAR. Due to the extensive amount of Department of the Navy, Department of Energy, Atomic Energy Commission, and NRC active and archived records that still need to be reviewed and analyzed, the projected date for SPAWAR completing the HRA is now 30 December 2017. This delay is not expected to change the projected date of 30 March 2028 for the completion of decommissioning activities. Enclosure (1) updates the revised projected milestones outlined in the Office of the Chief of Naval Operations Washington DC letter 5090 Serial N455/14U132792 of 20 October 2014.
