Subject: [External_Sender] HB Robinson reasonable assurance of public safety
Date: Sunday, October 09, 2016 11:46:32 AM

Stephanie

Good morning!

On Oct 08, 2016, a comprehensive investigation and collection of field data was performed by a joint FEMA/NRC Disaster Initiated Review (DIR) Team, in accordance with the FEMA Post Disaster Assessment of Offsite Capabilities checklist. Based on our review of all information gathered, FEMA has concluded that offsite radiological emergency preparedness remains adequate to provide "Reasonable Assurance" and that appropriate measures can be taken to protect the health and safety of the public in the event of a radiological emergency at the HB Robinson Nuclear Power Plant.

A letter will follow this week

Thank you!

Tim

Subject: Re: Harris and Robinson Emergency Declarations and intent to conduct DIRs for each

Anticipating Robinson response soon....if you would do me the great favor of texting when formal email notification is made that would much appreciated...it will assist in getting the message conveyed as quickly as possible

Thanks Tim

[Good evening!](#)

On 8 October 2016, based on the Preliminary Capabilities Assessment (PCA) performed, our review of available information gathered in discussions with the offsite response organizations, FEMA has

concluded that impediments may exist to offsite radiological emergency preparedness (EP) within the Shearon Harris Nuclear Power Plant and HB Robinson Nuclear Power plant EPZ. This requires further evaluation to verify appropriate measures can continue to be taken to protect the health and safety of the public in the event of a radiological emergency. FEMA is initiating a Disaster Initiated Review (DIR) of offsite EP issues within the Harris Nuclear Power Plant and Robinson Nuclear Power Plant EPZ.

FEMA anticipates a call being held on Sunday, 09Oct16 with North Carolina Emergency Management, offsite response organizations, emergency preparedness officials from HB Robinson Nuclear Power Plant, and FEMA and NRC regional leadership to determine next steps for that DIR.

FEMA anticipates a call being held early next week with North Carolina Emergency Management, offsite response organizations, emergency preparedness officials from Shearon Harris Nuclear Power Plant, and FEMA and NRC regional leadership to determine next steps for that DIR.

Thanks
Tim
