SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 33-27403-01

By letter dated August 31, 2016, you informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate your NRC radioactive materials license. The NRC Form 314 dated August 31, 2016, stated that all radioactive material had been transferred to your Arizona (13-032) and North Dakota (33-32706-01) Agreement State licenses.

The supporting documentation to the NRC Form 314 also provided a copy of the latest leak test results. The leak test results document that there was no evidence of leakage of radioactive material from the sealed source. NRC license number 33-27403-01 authorizes work at temporary job sites in NRC jurisdiction and no field stations are identified in this license. The NRC staff has reviewed the supporting documentation to your NRC Form 314 and has determined that no further remediation or actions with respect to NRC regulated material is required. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at 817-200-1590 if you have questions or require clarification on any of the information stated above.

Sincerely,

/RA/

Michelle Simmons, Health Physicist
Nuclear Materials Safety Branch B
