Corrections to 2011, 2012, 2013, and 2014 Annual Radiological Environmental Operating Reports

This letter submits changes to the 2011, 2012, 2013, and 2014 Annual Radiological Environmental Operating Reports (AREORs). The changes do not impact the conclusions of the reports. Four Enclosures attached to this letter identify the specific corrections, affected pages, and the corrected pages in their entirety.

If you have any questions concerning this information, please contact Mr. Stephen Sollom at (763) 295-1611.

Summary of Commitments

This letter makes no new commitments and no revisions to existing commitments.

A handwritten signature in black ink, appearing to read 'Peter A. Gardner', is written over a horizontal line.

Peter A. Gardner  
Site Vice President, Monticello Nuclear Generating Plant  
Northern States Power Company – Minnesota

Enclosures:

Enclosure 1: Corrections to the 2011 AREOR  
Attachment 1: Replacement pages for 2011 AREOR  
Attachment 2: Additional pages for the 2011 AREOR  
Enclosure 2: Corrections to the 2012 AREOR  
Attachment 1: Replacement pages for 2012 AREOR  
Attachment 2: Additional pages for the 2012 AREOR  
Enclosure 3: Corrections to the 2013 AREOR  
Attachment 1: Replacement pages for the 2013 AREOR  
Enclosure 4: Correction to the 2014 AREOR  
Attachment 1: Replacement pages for the 2014 AREOR

**ENCLOSURE 1**

**CORRECTIONS TO THE 2011 AREOR**

Broadleaf vegetation samples were not collected since 2011 due to unavailability; these samples were not included as missed samples, because they were considered to be above and beyond required samples. Since they were included in the Offsite Dose Calculation Manual (ODCM) ODCM-07.01 Table 1, they were required samples for Monticello Nuclear Generating Plant and should have been included as missed samples. The affected pages have been included in their entirety (Attachment 1) and should replace existing pages (5 and 17), ML12135A041.

The complete data tables were to be submitted as part of the report; however, this data was not included with the annual reports prior to 2013. Attachment 2 will be added to the back of the annual report as submitted; this will be an addition to the report and will not be replacing any pages in the report.

**ENCLOSURE 1**

**ATTACHMENT 1**

**REPLACEMENT PAGES FOR THE 2011 AREOR**

### 3.3 Program Execution

The Program was executed as described in the preceding section with the following exceptions:

(1) Air Particulates / Air Iodine:

No air particulate / air iodine sample was available from location M-01 for the week ending June 29, 2011. There was no power, due to an open fuse.

No air particulate/air iodine sample was available from location M-03 for the week ending September 14, 2011. Run-time was significantly lower than expected.

(2) Thermoluminescent Dosimeters:

The TLD for location M-05S was missing in the field for the third quarter, 2011.  
The TLD for location M-1B was missing in the field for the fourth quarter, 2011.

(3) Surface Water:

Surface water was not collected at location M-08 during the months of January and February, 2011, due to unsafe ice conditions. The June 14, 2011 sample for composite was damaged in transit.

(4) Well Water:

Well water was not collected at location MW-1 in January, 2011.  
The January, 2011 sample collected from MW-12A sample was damaged in transit.

Well water from location MW-13A, October 17, 2011, was damaged in transit.

(5) Milk

Milk was not available from locations M-16 and M-17 for January and February, 2011 collections. No milk was available from location M-17 after November 9, 2011.

(6) Invertebrates

Bottom organisms were not collected in the Spring of 2011, due to high river levels.  
Bottom organisms could not be collected from control location M-8 in the Fall of 2011, due to high river levels.

(7) Broad Leaf Vegetables

Broad Leaf Vegetables were not collected in 2011 due to unavailability. The previous Critical Garden ceased to be used and attempts to obtain a sample from the new Critical Garden were unsuccessful.

Deviations from the program are summarized in Table 5.3.

### 3.4 Laboratory Procedures

The iodine-131 analyses in milk and drinking water were made using a sensitive radiochemical procedure which involves separation of the iodine using an ion-exchange method and solvent extraction and subsequent beta counting.

Gamma-spectroscopic analyses are performed using high-purity germanium (HPGe) detectors. Levels of iodine-131 in cabbage and natural vegetation and concentrations of airborne iodine-131 in charcoal samples were determined by gamma spectroscopy.

Table 5.3. MISSED COLLECTIONS AND ANALYSES

All required samples were collected and analyzed as scheduled with the following exceptions:					
Sample Type	Analysis	Location	Collection Date or Period	Reason for not conducting REMP as required	Plans for Preventing Recurrence
SW	Gamma	M-08	January	Water frozen.	None Required
SW	Gamma	M-08	February	Water frozen.	None Required
SW	For composite	M-08	6/14/2011	Sample damaged in transit.	None Required
WW	Gamma, H-3	MW-1	1/17/2011	Well not sampled, frozen.	None Required
WW	Gamma, H-3	MW-12A	1/17/2011	Container damaged in transit.	None Required
WW	Gamma, H-3	MW-13A	10/17/2011	Container damaged in transit.	None Required
TLD	Gamma	M-5S	10/3/2011	TLD missing in field.	Replaced, vandalism
TLD	Gamma	M-1B	1/4/2012	TLD missing in field.	Replaced, vandalism
AP/AI	Beta, I-131	M-1	6/29/2011	No power at sampler.	Power restored by utility.
AP/AI	Beta, I-131	M-3	9/14/2011	Elapsed time low.	Replaced with spare, repaired affected pump.
MI	Gamma, I-131	M-16, 17	1/31/2011	Milking discontinued until Spring.	None Required
MI	Gamma, I-131	M-17	12/14/2011	Milking discontinued for the year.	None Required

## 1.0 INTRODUCTION

The following constitutes the final 2011 report for the Environmental Radiological Monitoring Program conducted at the Monticello Nuclear Generating Plant in Monticello, Minnesota. Results of completed analyses are presented in the attached tables.

All concentrations, except gross beta, are decay corrected to the time of collection.

All samples were collected within the scheduled period unless noted otherwise in the Listing of Missed Samples.

## 2.0. LISTING of MISSED SAMPLES

All required samples were collected and analyzed as scheduled with the following exceptions:					
Sample Type	Analysis	Location	Collection Date or Period	Reason for not conducting REMP as required	Plans for Preventing Recurrence
SW	Gamma	M-08	January	Water frozen.	None Required
SW	Gamma	M-08	February	Water frozen.	None Required
SW	For composite	M-08	6/14/2011	Sample damaged in transit.	None Required
WW	Gamma, H-3	MW-1	1/17/2011	Well not sampled, frozen.	None Required
WW	Gamma, H-3	MW-12A	1/17/2011	Container damaged in transit.	None Required
WW	Gamma, H-3	MW-13A	10/17/2011	Container damaged in transit.	None Required
TLD	Gamma	M-5S	10/3/2011	TLD missing in field.	Replaced, vandalism
TLD	Gamma	M-1B	1/4/2012	TLD missing in field.	Replaced, vandalism
AP/AI	Beta, I-131	M-1	6/29/2011	No power at sampler.	Power restored by utility.
AP/AI	Beta, I-131	M-3	9/14/2011	Elapsed time low.	Replaced with spare, repaired affected pump.
MI	Gamma, I-131	M-16, 17	1/31/2011	Milking discontinued until Spring.	None Required
MI	Gamma, I-131	M-17	12/14/2011	Milking discontinued for the year.	None Required
BO	Gamma	M-8, M-9	Spring	High water prevented sampling.	None Required
BO	Gamma	M-8	Fall	High water prevented sampling.	None Required
VE	I-131	Highest D/Q Garden and Control	At Harvest	Samples became unavailable when previous Critical Garden ceased to be used.	Attempted to obtain a sample from new Critical Garden

**ENCLOSURE 2**

**CORRECTIONS TO THE 2012 AREOR**

Broadleaf vegetation samples were not collected since 2011 due to unavailability; these samples were not included as missed samples, because they were considered to be above and beyond required samples. Since they were included in the Offsite Dose Calculation Manual (ODCM) ODCM-07.01 Table 1, they were required samples for Monticello Nuclear Generating Plant and should have been included as missed samples. The affected pages have been included in their entirety (Attachment 1) and should replace existing pages (5 and 17), ML13135A006.

The complete data tables were to be submitted as part of the report; however, this data was not included with the annual reports prior to 2013. Attachment 2 will be added to the back of the annual report as submitted; this this will be an addition to the report and will not be replacing any pages in the report.

**ENCLOSURE 2**

**ATTACHMENT 1**

**REPLACEMENT PAGES FOR THE 2012 AREOR**

### 3.3 Program Execution

The Program was executed as described in the preceding section with the following exceptions:

(1) Air Particulates / Air Iodine:

- M-02. Volume for the week ending January 4, 2012 was lower than expected. A short power outage is suspected.  
No air particulate sample was collected for the week ending June 27, 2012, the filter was misaligned in the holder.
- M-03. No air particulate / air iodine sample was available for the week ending May 9, 2012, the timer reading was low due to power interruption.  
No air particulate sample was collected for the week ending June 27, 2012, the filter was misaligned in the holder.  
No air particulate / air iodine sample was available for the week ending July 18, 2012, low volume due to power interruption.
- M-04. No air particulate / air iodine sample was available for the week ending May 30, 2012, the timer reading was low due to power interruption.
- M-05. No air particulate / air iodine sample was available for the week ending May 30, 2012, the volume was low due to power interruption.

(2) Thermoluminescent Dosimeters:

The TLD for location M-01B was missing in the field for the first quarter, 2012.  
The TLD for location M-08A was missing in the field for the first quarter, 2012.  
The TLD for location M-11A was missing in the field for the fourth quarter, 2012.

(3) Surface Water:

Surface water was not collected at location M-08 for the weeks ending January 25 through February 15, 2012. The water was not collected due to unsafe ice conditions. Both the January and February monthly composite samples were made up from available collections.

(4) Well Water:

Well water was not collected at location MW-27 in January, 2012. The outside well was locked and the residence was vacant.

(5) Milk

Milk was not available from locations M-16 and M-17 for the January through March, 2012 collections. No milk was available after November 7, 2012.

(6) Invertebrates

Bottom organisms were not collected in the Spring of 2012, due to high river levels.

(7) Shoreline Sediments

Shoreline sediment was not collected in the Spring of 2012, due to high river levels.

(8) Broad Leaf Vegetable

Broad Leaf Vegetables were not collected in 2012 due to unavailability. The previous Critical Garden ceased to be used and attempts to obtain a sample from the new Critical Garden were unsuccessful.

Deviations from the program are summarized in Table 5.3.

Table 5.3. MISSED COLLECTIONS AND ANALYSES

All required samples were collected and analyzed as scheduled with the following exceptions:					
Sample Type	Analysis	Location (s)	Collection Date or Period	Reason for not conducting REMP as required	Plans for Preventing Recurrence
AP/AI	Beta, I-131	M-2	1/4/2012	Low sample volume. Short power outage suspected.	Power restored.
AP/AI	Beta, I-131	M-3	5/9/2012	Low timer reading, possible power failure.	Power restored.
AP/AI	Beta, I-131	M-3, M-4, M-5	5/30/2012	Low timer reading, power interruption.	Power restored.
AP	Beta, I-131	M-2, M-3	6/27/2012	Filters misaligned in holder, no particulate accumulation.	Technician training reviewed
SW	For composite	M-08	1/25/2012	Water frozen.	None Required
SW	For composite	M-08	2/1, 2/8, 2/15, 2012	Water frozen.	None Required
SW	For composite	M-08	12/15/2012	Water frozen.	None Required
WW	Gamma, H-3	M-27	1/18/2012	Outside well locked; residence vacant.	None Required
WW	Gamma, H-3	MW-14	10/17/2012	Well not collected.	Well contents frozen.
MI	Gamma, I-131	M-16, 17	1/31/2012	Milking discontinued until Spring.	None Required
MI	Gamma, I-131	M-16, 17	12/31/2012	Milking discontinued for the year.	None Required
TLD	Gamma	M-1B, M-8A	1st Qtr. 2012	TLD missing in field.	Replaced, vandalism
TLD	Gamma	M-11A	4th Qtr. 2012	TLD missing in field.	Replaced, vandalism
BO	Gamma	M-8, M-9	Spring	High water prevented sampling.	None Required
SS	Gamma	M-8, M-9	Spring	High water prevented sampling.	None Required
VE	I-131	Highest D/Q Garden and Control	At Harvest	Samples became unavailable when previous critical garden ceased to be used.	Attempted to obtain a sample from new Critical Garden

17	Shoreline sediments, analysis for gamma-emitting isotopes .....	17-1

## 1.0 INTRODUCTION

The following constitutes the final 2012 report for the Environmental Radiological Monitoring Program conducted at the Monticello Nuclear Generating Plant in Monticello, Minnesota. Results of completed analyses are presented in the attached tables.

All concentrations, except gross beta, are decay corrected to the time of collection.

All samples were collected within the scheduled period unless noted otherwise in the Listing of Missed Samples.

## 2.0. LISTING of MISSED SAMPLES

All required samples were collected and analyzed as scheduled with the following exceptions:					
Sample Type	Analysis	Location (s)	Collection Date or Period	Reason for not conducting REMP as required	Plans for Preventing Recurrence
AP/AI	Beta, I-131	M-2	1/4/2012	Low sample volume. Short power outage suspected.	Power restored.
AP/AI	Beta, I-131	M-3	5/9/2012	Low timer reading, possible power failure.	Power restored.
AP/AI	Beta, I-131	M-3, M-4, M-5	5/30/2012	Low timer reading, power interruption.	Power restored.
AP	Beta, I-131	M-2, M-3	6/27/2012	Filters misaligned in holder, no particulate accumulation.	Technician training reviewed
SW	For composite	M-08	1/25/2012	Water frozen.	None Required
SW	For composite	M-08	2/1, 2/8, 2/15, 2012	Water frozen.	None Required
SW	For composite	M-08	12/15/2012	Water frozen.	None Required
WW	Gamma, H-3	M-27	1/18/2012	Outside well locked; residence vacant.	None Required
WW	Gamma, H-3	MW-14	10/17/2012	Well not collected.	Well contents frozen.
MI	Gamma, I-131	M-16, 17	1/31/2012	Milking discontinued until Spring.	None Required
MI	Gamma, I-131	M-16, 17	12/31/2012	Milking discontinued for the year.	None Required
TLD	Gamma	M-1B, M-8A	1st Qtr. 2012	TLD missing in field.	Replaced, vandalism
TLD	Gamma	M-11A	4th Qtr. 2012	TLD missing in field.	Replaced, vandalism
BO	Gamma	M-8, M-9	Spring	High water prevented sampling.	None Required
SS	Gamma	M-8, M-9	Spring	High water prevented sampling.	None Required
VE	I-131	Highest D/Q Garden and Control	At Harvest	Samples became unavailable when previous critical garden ceased to be used.	Attempted to obtain a sample from new Critical Garden

### 3.0 DATA TABLES

**ENCLOSURE 3**

**CORRECTIONS TO THE 2013 AREOR**

Broadleaf vegetation samples were not collected since 2011 due to unavailability; these samples were not included as missed samples, because they were considered to be above and beyond required samples. Since they were included in the Offsite Dose Calculation Manual (ODCM) ODCM-07.01 Table 1, they were required samples for Monticello Nuclear Generating Plant and should have been included as missed samples. The affected pages have been included in their entirety and should replace existing pages (5 and 17 of the main report, and V of the Completed Data Tables), ML14139A025.

### 3.3 Program Execution

The Program was executed as described in the preceding section with the following exceptions:

(1) Air Particulates / Air Iodine:

M-01, No air particulate / air iodine sample was available from for the week ending January 16, 2013, the sampler failed down due to a faulty toggle switch.

M-01, A partial air particulate / air iodine sample (54 m3) was collected for the week ending May 1, 2013, due to sampler failure. No air particulate / air iodine sample was available for the week ending May 8, 2013, due to sampler failure. The vacuum pump was replaced.

M-02, No air particulate sample was collected for the week ending November 27, 2013, the filter was misaligned in the holder.

(2) Surface Water:

Surface water was not collected at location M-08 for the months of January, February, March and December, 2013, due to unsafe ice conditions.

(3) Well Water:

Well water was not collected at location MW-27 in January, 2013. No water was available from the outside tap.

(4) Drinking Water (M-14):

No sample was available for the January 13, 2013 collection. The sample was damaged in shipment. The drinking water sample for May 17, 2013 was lost during shipping.

No drinking water sample was available November 27, 2013. The sample was missed.

(5) Milk

There was no goat milk available from locations M-16 and M-17 in 2013. Goats are no longer milked at location M-16, the herd has been sold.

(6) Broad Leaf Vegetables

Broad Leaf Vegetables were not collected in 2013 due to unavailability. The previous Critical Garden ceased to be used and attempts to obtain a sample from the new Critical Garden were unsuccessful.

Deviations from the program are summarized in Table 5.3.

### 3.4 Program Modifications

Milk sampling was dropped from the REMP in 2013. The indicator location M-16, discontinued dairy operations.

Modifications to the Groundwater monitoring program are detailed in Appendix E.

Table 5.3. MISSED COLLECTIONS AND ANALYSES

All required samples were collected and analyzed as scheduled with the following exceptions:					
Sample Type	Analysis	Location	Collection Date or Period	Reason for not conducting REMP as required	Plans for Preventing Recurrence
WW	Gamma, H-3	M-014	1/13/2013	Sample damaged in shipment.	None required.
AP/AI	Beta, I-131	M-01	1/16/2013	Pump found off.	Sampler restarted.
SW	Gamma	M-008	Jan. 2013	Water frozen entire month; no composite.	None required.
WW	Gamma, H-3	M-027	1/23/2013	Residence vacant, water turned off.	None required.
SW	Gamma	M-008	Feb. 2013	Water frozen entire month; no composite.	None required.
SW	Gamma	M-008	Mar. 2013	Water frozen entire month; no composite.	None required.
SW	H-3	M-008	1st Qtr '13	Water frozen entire quarter; no composite.	None required.
AP/AI	Beta, I-131	M-01	5/1/2013	Pump found off.	Sampler pump replaced.
WW	Gamma, H-3	M-014	5/7/2013	Sample damaged in shipment.	None required.
AP/AI	Beta, I-131	M-01	5/8/2013	Pump failure.	Sampler pump replaced.
AP/AI	Beta, I-131	M-02	11/27/2013	Filter misaligned in holder; light particulate collected.	Technician coached on verification practices.
WW	Gamma, H-3	M-014	11/27/2013	No sample taken.	Technician coached on proper turnover.
SW	Gamma	M-008	Dec. 2013	Water frozen entire month; no composite.	None required.
VE	I-131	Highest D/Q Garden and Control	At Harvest	Samples became unavailable when previous Critical Garden ceased to be used.	Attempted to obtain a sample from new Critical Garden

## 2.0. LISTING of MISSED SAMPLES

All required samples were collected and analyzed as scheduled with the following exceptions:					
Sample Type	Analysis	Location	Collection Date or Period	Reason for not conducting REMP as required	Plans for Preventing Recurrence
WW	Gamma, H-3	M-014	1/13/2013	Sample damaged in shipment.	None required.
AP/AI	Beta, I-131	M-01	1/16/2013	Pump found off.	Sampler restarted.
SW	Gamma	M-008	Jan. 2013	Water frozen entire month; no composite.	None required.
WW	Gamma, H-3	M-027	1/23/2013	Residence vacant, water turned off.	None required.
SW	Gamma	M-008	Feb. 2013	Water frozen entire month; no composite.	None required.
SW	Gamma	M-008	Mar. 2013	Water frozen entire month; no composite.	None required.
SW	H-3	M-008	1st Qtr '13	Water frozen entire quarter; no composite.	None required.
AP/AI	Beta, I-131	M-01	5/1/2013	Pump found off.	Sampler pump replaced.
WW	Gamma, H-3	M-014	5/7/2013	Sample damaged in shipment.	None required.
AP/AI	Beta, I-131	M-01	5/8/2013	Pump failure.	Sampler pump replaced.
AP/AI	Beta, I-131	M-02	11/27/2013	Filter misaligned in holder; light particulate collected.	Technician coached on verification practices.
WW	Gamma, H-3	M-014	11/27/2013	No sample taken.	Technician coached on proper turnover.
SW	Gamma	M-008	Dec. 2013	Water frozen entire month; no composite.	None required.
VE	I-131	Highest D/Q Garden and Control	At Harvest	Samples became unavailable when previous Critical Garden ceased to be used.	Attempted to obtain a sample from new Critical Garden

## 1.0 INTRODUCTION

This appendix to the Radiological Environmental Monitoring Program Annual Report to the United States Nuclear Regulatory Commission summarizes and interprets results of the Ground Water Monitoring Program samples taken at the Monticello Nuclear Plant, Monticello, Minnesota, during the period January – December 2014. This sampling program was established in October of 2006 following the industry initiative on ground water monitoring.

## 2.0 SUMMARY

The Ground Water Sampling Program was established following industry events where tritium was discovered in ground water surrounding commercial nuclear facilities. This program is described and the results for 2014 are summarized and discussed.

Program findings for 2014 detected low levels of tritium in monitoring wells located on the plant property. With the exception of monitoring wells MW-9A and MW-13A, tritium measured at or near expected natural background levels. Tritium was detected at a concentration greater than 500 pCi/l in one of four storm water runoff samples collected from storm water outfall sample point SD-006. Tritium was not detected in either of two samples collected from the sewer lift station. The 2014 sample results (excluding MW-9A and MW-13A and one storm water runoff sample) all measured below the required limit of 500 pCi/L. Measurements for 2014 were below the Environmental Protection Agency's drinking water standard of 20,000 pCi/L and present no harm to members of the public.

None of the samples monitored for gamma-emitting isotopes showed activity greater than the LLD. A summary of the analytical data for ground water monitoring wells and storm water runoff samples is provided in Table E-3. Complete data tables for each period and location are provided in Table E-4.

### **3.0 Ground Water Sampling Program**

#### **3.1 Program Design and Data Interpretation**

The purpose of this sampling program is to assess the impact of any tritium leaching into the environment (ground water system) from MNGP. For this purpose, water samples are collected and analyzed for tritium content.

#### **3.2 Program Description**

The sampling and analysis schedule for the Ground Water Monitoring Program is summarized in Table E-1 and briefly reviewed below. Table E-2 defines the additional sample locations and codes for the Ground Water Sampling Program.

Sampling from the groundwater monitoring wells was conducted monthly for seven locations, quarterly for eight locations, and annually for four locations.

#### **3.3 Program Execution**

The Program was executed as described with the following exceptions:

Two monitoring well samples for MW-14 were missed in 2014:

- In June 2014, river water levels (912.3 ft) were above the height of the monitoring well riser (911.3 ft).
- In November 2014, the sample was unobtainable due to the well casing being encased in ice.

Additional analyses for gamma emitting isotopes were performed on samples from each of the nineteen monitoring wells. The results are summarized in Table E-3. Results of individual analyses are reported in Table E-4.

#### **3.4 Program Modifications**

There were no additional on-site monitoring wells added to the ground water program in 2014.

### 3.5 Results and Discussions

Sampling points in North America have shown tritium concentrations in precipitation may range from 5 pCi/L to 157 pCi/L (Environmental Isotope Data No. 10; World Survey of Isotope Concentration in Precipitation (1988-1991). Results obtained show tritium in ground water samples at or near expected natural background levels, with the exception of monitoring wells, MW-9A and MW-13A.

Excluding the data from wells MW-9A and MW-13A and SD-006, 2014 sample results all measured below an LLD level of 500 pCi/L, and were similar to averages measured in 2013.

The average for 2014 at location MW-9A was 3296 pCi/L which is a decline from the 2013 average of 5457 pCi/L. The highest level that was observed in 2014 was 5911 pCi/L for the November 2014 sample. Three of the monthly samples were below the LLD of 500 pCi/L.

The tritium levels observed at location MW-13A for 2014 ranged from a high of 935 pCi/L in January, fell to 715 pCi/L in February, then stayed below 600 pCi/L for the remainder of the first half of the year and then below the LLD of 500 pCi/L for the remainder of the year.

None of the groundwater samples analyzed for gamma-emitting isotopes showed activity greater than LLD.

**Table E-1. Sample Collection and Analysis Program, Ground Water.**

Medium	Number	Sample Codes	Collection type	Analysis Type
Ground Water Quarterly	32	MW-1, MW-2, MW-3, MW-4, MW-9B, MW-11, MW-12A, MW-12B,	Grab	H-3
Ground Water Monthly	82	MW-9A, MW-10, MW-13A, MW-13B, MW-14, MW-15A MW-15B,	Grab	H-3
Ground Water Annual	4	MW-5, MW-6, MW-7, MW-8	Grab	H-3
