Dear Mr. Lombard:

This letter is in regards to Docket No. 71-9329. The U.S. Department of Energy, National Nuclear Security Administration (NNSA) is requesting renewal of Certificate of Compliance (CoC) Number 9329 for Model No. S300 package (Identification No. USA/9329/AF-96) based on the currently approved Revision 5 of the S300 package Safety Analysis Report (SAR) without any changes. The CoC expires January 31, 2017. Other than a new expiration date, all previously approved documentation, quality assurance commitments, and procedures remain valid.

A timely CoC renewal will facilitate the review and approval by foreign competent authorities for their jurisdictions prior to the current expiration date. Given no changes have been made to the package or the SAR, and to facilitate the review and approval by foreign competent authorities, NNSA requests that the Nuclear Regulatory Commission expeditiously renew CoC Number 9329 for Model No. S300 package by October 15, 2016.

If you have any questions in regards to this application please contact me at (505) 845-4607 or Nohemi Brewer, of my staff, at (505) 845-5768.

Sincerely,

Ahmad M. Al-Daouk,
NNSA Certifying Official
