Margo  
Actually I do have something from this FOIA.

NMSS reviewed the report attached to FOIA/PA 2016-0517. (see below).

View ADAMS P8 Properties ML12255A276

Open ADAMS P8 Document (C. Bladey Memo re: Notice of Availability - Louisiana Enrichment Services - License SNM-2010.)

There is no issue with making ADAMS P8 Document ML12255A276 (C. Bladey Memo re: Notice of Availability - Louisiana Enrichment Services - License SNM-2010) publically available.

**From:** Stevens, Margo

**To:** Woods, Carolyn <Carolyn.Woods@nrc.gov>  
**Subject:** RE: FOIA 0517

Carolyn. This isn't a question of having records. This was a referral to NMSS to look over the spreadsheet that I had sent you and, for the items (rows) that belong to NMSS (including FSME), tell me whether you had any objection to releasing the content of the items.

I'm not sure why this has been as difficult as it has been. But, at this point, I am going to interpret the communications I have received from NMSS as raising no concern with the release of the information on the spreadsheet.

Good Morning Nina,

Please review this final FOIA response in FOIAXpress. It can be located in the 2016 folder titled 2016-0571 (SAB).

It is 93 pages with only Ex. 6 on certain pages. This is for Tarver, he requested a copy of the incoming requests.

Stephanie

**Subject:** FOIA-2016-0131A (appeal of the adequacy of search in FOIA-2016-0517)  
**Importance:** High

Good morning Margie (I see that you are out of the office until 8/3; given the short window we have for providing FOIA appeal responses, I am copying Mary, with the hope that she could direct my inquiry to someone else).

You may recall that you worked with me on the initial response in FOIA\_2016-0517. This was the request (from Julian Tarver) for the assessment done of NRC staff's compliance with the SUNSI rules in categorizing records as "publicly available" or "non-publicly available" when added to ADAMS. Apparently, the genesis of the request is the delegation to the Director, OIS to perform the following responsibility: "Conducts annual assessments of the accuracy with which NRC staff are applying the agency's criteria for designating records as public or non-public."

While processing the initial request, I learned the background of this assessment. An OIG audit recommended that this assessment be done annually to ensure that NRC staff were appropriately applying the SUNSI rules. OIS did the assessment for a five-year period, at which time it concluded that – with the very high level of correct application of the SUNSI rules, it wasn't a good use of staff resources to continue to do the assessment. The latest, and last, assessment was done in 2013.

(b)(5)

Thanks.

Stephanie, if you have the time, could you please review the draft appeal response I've prepared in the above-referenced appeal? It's in FOIA Xpress as the Pending Appeal Response Letter.

To make your review easier, I've attached a copy of his incoming request, incoming appeal letter, and our response. The assessment itself is in FOIA Xpress Doc Manager.. The only redaction is on page 13 of the assessment; the rest of the responsive pages were released in full, so the review flag should identify it readily.

Based on this, I did two things. First, for the sampled documents, I went to each of the originating program offices to ensure they didn't have any concerns with release. They didn't. I identified the 3<sup>rd</sup> party subject's name in the one OI document (b)(5)
