Subject: NRC Feedback on FAQ 14-0007 on Transient frequency 10_19_16
Attachments: NRC critique of FAQ 14-0007 on Transient frequency 10_19_16 to NEI.DOCX

Hello Victoria,

NRC staff has completed the review of FAQ 14-0007 on Transient frequency 10_19_16. Comments on staff's position are located in the front portion of the attached document. (Note that previously exchanged comments follow the latest staff position and are attached in reverse chronological order).

We would like to host a face to face Fire PRA FAQ meeting to further discuss this topic on November 15 (Tuesday) or November 17 (Thursday) from 10am -12noon.

Let me know if the industry can support one of these dates. Also, please let us know whether or not the industry would like to discuss any additional topics during this FAQ meeting.

Thanks,

Leslie C. Fields
