U.S. Nuclear Regulatory Commission
Washington, D.C. 20555-0001

Watts Bar Nuclear Plant, Unit 2
Facility Operating License No. NPF-96
NRC Docket No. 50-391

Subject: Correction to Update to TMI Action I.D.1 Commitment Closure Regarding Control Room Design Review Special Program

- References:
1. TVA Letter to NRC, "Update to TMI Action I.D.1 Commitment Closure Regarding Control Room Design Review Special Program," dated September 30, 2016
 2. TVA Letter to NRC, CNL-034, "TMI Task Action 1.D.1 Commitment Closure Regarding Control Room Design Review Special Program," dated February 19, 2016 (ML160694304)

In Reference 1, the Tennessee Valley Authority (TVA) submitted an update to the information provided in Reference 2 for the Watts Bar Nuclear Plant (WBN) Unit 2 commitment closure regarding the Three Mile Island (TMI) Action I.D.1, Control Room Design Review Special Program. Reference 1 stated that the enclosure to Reference 1 provided updates and superseded the information that was provided in the compact disk (CD) that was submitted in Reference 2. Reference 1 should have correctly stated that the enclosure to Reference 1 supplemented the information that was provided in the CD that was submitted in Reference 2.

There are no new regulatory commitments in this letter. If you have any questions, please contact Gordon Arent, Director of Watts Bar Site Licensing, at (423) 365-2004.

Respectfully,

A handwritten signature in black ink, appearing to read "Paul Simmons", is written over a horizontal line.

Paul Simmons
Site Vice President, Watts Bar Nuclear Plant
