Michael Stevenson, Ph.D., Radiation Safety Officer  
Idaho Department of Health & Welfare  
Bureau of Laboratories  
2220 Old Penitentiary Road  
Boise, ID 83712

SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 11-27390-01

By Email dated August 25, 2016, you informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate your NRC radioactive materials license. The NRC Form 314 dated August 24, 2016, stated that the radioactive material devices you possess are classified as generally licensed (GL), as verified during the NRC inspection conducted on August 17, 2016, and do not require a specific license.

The supporting documentation to the NRC Form 314 also provided a copy of the latest leak test results. The leak test results document that there was no evidence of leakage of radioactive material from the sealed source. The NRC staff has reviewed the supporting documentation to your NRC Form 314. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material has been classified as generally licensed. Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment No. 7 to License No. 11-27390-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at (817) 200-1286 if you have questions or require clarification on any of the information stated above.

Sincerely,

A handwritten signature in blue ink, appearing to read "Latischa M. Hanson".
