Docket No. 11005700

License Nos. IW022/05  
XW012/05

**ORDER**

On September 15, 2016, Marv Lewis, an individual, submitted a filing requesting an extension of the period for filing public comments and hearing on Perma-Fix's applications to amend and renew existing licenses to import (IW022/05<sup>1</sup>) and export (XW012/05<sup>2</sup>) Canadian-origin low level radioactive waste. On October 17, 2016, the Nuclear Regulatory Commission returned the import and export applications to the applicant without further action.<sup>3</sup> The October 17 return letter stated that the applications were incomplete as to the descriptions of the Class B waste that the applicant intended to import and export and that, as a result, the Federal Register notice made available to the public for comment did not adequately describe the type of radioactive material being requested for import/export.

Since the subject applications are no longer pending, I deny Mr. Lewis's request for hearing and for extension of time as moot, without prejudice. In the event that the applications are resubmitted, a new Federal Register notice will be published.

This Order is issued under my authority in 10 C.F.R. § 110.88.
