Dear Mr. Hanson:

On May 27, 2016, the U. S. Nuclear Regulatory Commission (NRC) issued the subject report, Agencywide Documents Access and Management System (ADAMS) Accession Nos: ML16152A017 and ML16152A016. Following issuance of this report the NRC conducted an internal review and determined that some of the language used to describe a non-cited violation may have contributed to uncertainty regarding the scope of long term corrective actions. The NRC has revised the report to remove this language and now only references the underlying requirements. Please replace the attached Section 3S04 (pages 4-6) in the original report with the enclosed pages.

We apologize for any inconvenience that this may have caused. Should you have any questions concerning this change, please contact Raymond McKinley, Chief, Plant Support Branch 1 at (610) 337-5150.

In accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) §2.390, "Public Inspections, Exemptions, Requests for Withholding," of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC's Public Document Room or from the Publicly Available Records (PARS) component of ADAMS. ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

However, the material enclosed herewith contains Security-Related Information in accordance with 10 CFR §2.390(d)(1) and its disclosure to unauthorized individuals could present a security vulnerability. Therefore, the material in the enclosure will not be made available electronically for public inspection in the NRC Public Document Room or from the PARS component of NRC's ADAMS.

Enclosure contains Sensitive Unclassified Non-Safeguards Information. When separated from Enclosure, the transmittal documented is decontrolled.
