NUCLEAR REGULATORY COMMISSION

BEFORE THE ATOMIC SAFETY AND LICENSING BOARD

DECLARATION IN SUPPORT OF CITIZENS' RESISTANCE AT FERMI 2'S (CRAFT)
FILING TO REOPEN HEARING IN DOCKET NO. 50-341, FERMI 2'S 20-YEAR LICENSE
EXTENTION

I, Jesse J. Deer In Water, declare as follows:

- I reside at 17397 Five Points St., Redford MI 48240 which is within 50-miles of the Fermi 2 nuclear reactor, owned and operated by DTE Electric, a wholly owned subsidiary of DTE Energy.
- I am concerned that if the NRC approves DTE's requested license extension, the extended operation would adversely affect my health and safety, and the integrity of my quality of life.
- I am concerned about the risks of a disaster on the scale of Fukushima, either by accident or sabotage in which people within the 50-mile radius were evacuated.
- I am concerned about Fermi's spent fuel pool and the dangerous storage of high-level nuclear waste on the shores of Lake Erie.
- I believe nuclear power is an outdated technology and DTE should be replaced by sustainable energy sources.
- In order to ensure that the licensing decision for the Fermi 2 reactor protects my interest in a safe and healthy environment, I authorize CRAFT to act on my behalf to ensure the permitting proceedings and any associated rulemakings are conducted fairly, efficiently, and in a manner, that provides the full consideration of issues that could affect my safety and health, and the health of the environment left for future generations.
- I believe the ASLB should reopen the hearing.

I declare that the foregoing fact are true and correct and that any expressions of opinion are based on my judgement.
