Renewed Facility Operating License Nos. NPF-11 and NPF-18
NRC Docket Nos. 50-373 and 50-374

Subject: Withdrawal of Request for Relief from ASME OM Code for the Fourth Inservice Testing Interval

References: 1) Letter from D. M. Gullott (Exelon Generation Company, LLC) to U.S. Nuclear Regulatory Commission, "Relief Requests Associated with the Fourth Interval Inservice Testing Program," dated October 17, 2016

2) Letter from J. Barstow (Exelon Generation Company, LLC) to U.S. Nuclear Regulatory Commission, "Relief Request for an Alternative to the ASME Code," dated July 26, 2016

In the letter dated October 17, 2016 (Reference 1), Exelon Generation Company, LLC (EGC) requested approval of proposed alternatives to the American Society of Mechanical Engineers (ASME) Code for Operation and Maintenance of Nuclear Power Plants (OM Code), 2004 Edition with Addenda through OMB-2006. The relief requests are associated with the LaSalle County Station (LSCS) fourth 10-year IST interval, which is scheduled to start on October 12, 2017.

The purpose of this letter is to formally withdraw one of the six relief requests that were transmitted with Reference 1. Specifically, EGC is withdrawing the following relief request:

- Relief Request G-01, Utilization of ASME Code Case OMN-20, "Inservice Test Frequency" – Proposed Alternative In Accordance with 10 CFR 50.55a(z)(2)

The intent of Relief Request G-01 associated with ASME Code Case OMN-20 is duplicative to the EGC fleet relief request submitted July 26, 2016 (Reference 2), which is currently under NRC review.

There are no regulatory commitments contained within this letter.

Should you have any questions concerning this letter, please contact Ms. Lisa A. Simpson at (630) 657-2815.

Respectfully,

A handwritten signature in black ink, appearing to read "D. M. Gullott", followed by a horizontal line extending to the right.
