NUCLEAR REGULATORY COMMISSION**  
WASHINGTON, D.C. 20555-0001

December 5, 2016

Mr. Ahmad M. Al-Daouk, Director  
Office of Packaging and Transportation  
Department of Energy  
National Nuclear Security Administration  
P.O. Box 5400  
Albuquerque, NM 87185

SUBJECT: APPLICATION FOR THE MODEL NO. 380-B TRANSPORT PACKAGE –  
ACCEPTED FOR REVIEW (CAC NO. L25109)

Dear Mr. Al-Daouk:

By letter dated April 6, 2016 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML16102A136), and as supplemented on October 13 (ADAMS Accession No. ML16294A260) and October 20, 2016 (ADAMS Accession No. ML16301A022), the National Nuclear Security Agency (NNSA) submitted an application for approval of the Model No. 380-B transport package. The application proposes using the 380-B package for NNSA's Offsite Source Recovery Project mission, and to improve its source recovery capabilities. The package is designed with a leak tight containment.

The staff performed an acceptance review of your application to determine if the application contains sufficient technical information in scope and depth to allow the staff to complete a detailed technical review. With the information supplied on October 13 and October 20, 2016, the application appears to contain the information needed for our technical review.

We have established a schedule for the review and estimated that the staff may need approximately 1,000 hours to complete its review. The schedule allows for the staff to issue the first request for additional information (RAI) in February 2017 and, if a second RAI is not needed, a certificate of compliance in May 2017, based on you responding to the first RAI in March 2017. In general, no additional changes to the application should be submitted except for changes resulting from your response to an RAI.

If you have any questions regarding this matter, please contact me at (301) 415-6999.

Sincerely,

**/RA/**
