RE: Dosimetry Exemption

The Nuclear Regulatory Commission regulation 10 CFR § 34.47 Personnel monitoring requires that licensees use dosimeters that are processed and evaluated by a dosimetry processor that is NVLAP approved. Applied Technical Services, Inc. Virginia License locations utilize Mirion Technologies (GDS), Inc. Instadose personal dosimeters that do not require their return for processing and evaluation. It may be processed by plugging it into a USB port on a computer and reading it using the Instadose system.

Because this system does not require returning the dosimeters for processing, Applied Technical Services, Inc. is requesting an exemption from The Nuclear Regulatory Commission to the requirements in 10 CFR § 34.47 for authorization to utilize the Instadose dosimeter and process them on-site.
