I would like to also bring to the attention along the rail systems, the problem of gangs, illicit drug related, issue. It is estimated that 120,000 people jump trains yearly as of 2015, migrating south for the winter.

I believe these people need to be redirected as we continue to haul hazardous waste. Many of these rail transients kill for sport. I believe they pose a further threat to public safety, especially when a train is hauling hazardous waste.

I support the lowering of the threshold of what is actually allowed in transport by any method.

Thank you for allowing this public comment.

Most Sincerely,

Natalie Cox
