U.S. Environmental Protection Agency  
National Analytical Radiation Environmental Laboratory  
License No. 01-07317-01  
Docket No. 030-03576  
Control No. 592347

Mr. Kirby

In order to continue the review of your application to amend your NRC license, we need additional information. If you have any questions, please contact me (610-337-5089).

In your letter dated October 24, 2016, you requested that line item 8.E be increased to 9 millicuries for source material. This request, in combination with the authorization in Item D. for 9 millicuries of contaminated soil and/or mill tailings would authorize the EPA for a total of 18 millicuries (> 10 millicuries) of source material and would require additional decommissioning financial assurance and modification of your Statement of Intent and Certification of Financial Assurance.

Please modify your amendment request such that your license will not authorize the EPA for more than 10 millicuries of source material or submit a revised Statement of Intent and Certification of Financial Assurance that reflects the authorizations that you are requesting on the license.

Please respond in writing with a signed and dated letter. Please submit the signed response document as an attachment to an e-mail. Please be sure to include the Control No. 592347 on your response. We would appreciate a response within 10 days in order to expedite review of the license amendment request.

Thank you for your cooperation.
