Re: Export License PXB211.00 (nee PXB149.04) for Weatherford-Iraq

Dear Deputy Director Skeen,

Weatherford International, LLC (including subsidiaries and affiliate companies)¹ requests a replacement license for NRC license PXB149.04, now expired. Due to the expiration, a new application with a newly issued license number from OIP is being submitted, rather than an amendment request.

Weatherford's affiliate in Iraq, Weatherford Oil Tool Middle East Ltd (WOTME) performs oilfield services, including well logging, which utilize export controlled (Appendix P) radioactive material in the performance of these services. Additionally, Iraq is listed as an embargoed destination as per 10 CFR 110.28. In consultation with Stephen Baker of OIP, as per 10 CFR §170.31(15.F or 15.J), the fee for this application is \$14,600, which has been prepaid. Please find attached the "Pay.gov" proof of payment confirmations for that amount.

Note that WOTME retains effective control over these materials to prevent unauthorized access and when not in use are placed in secure storage under the effective control of WOTME².

Please extend the expiration date to the maximum permissible.

If you have any questions related to this matter, please do not hesitate to contact me.

Regards,

Jeffrey S. Pettigrew
HSE & Compliance Manager-Wireline
Weatherford International

Enc: NRC Form 7, Pay.gov confirmations (email & webpage)

¹ Previously NRC export/import licenses have been tendered under the name of Weatherford International, Inc. and its subsidiary Precision Energy Services, a Weatherford company.

² Some secure storage may be located within areas/compounds controlled by the Iraqi government and/or WOTME's customers (intermediate consignees).
