RE: Response to the Apparent Violations; EA-16-30

During the final exit meeting which followed routine inspections conducted from January 19-21, 2016, the NRC identified three apparent violations:

1. A deliberate failure to conduct radiography at a temporary job site with at least two qualified individuals.
2. A deliberate failure to conduct a survey of the radiographic exposure device and guide tube after each exposure when approaching the device.
3. A deliberate failure to perform visual and operability checks on radiographic exposure devices.

JANX admits these violations, which were performed by a single crew of two radiographers. As described by the Executive Summary that accompanied the letter dated February 25, 2016, these violations were observed by JANX's RSO on September 19, 2015. The violations occurred due to the individuals' blatant disregard to regulatory requirements and company procedures.

As a corrective action to these violations:

JANX immediately terminated the employment of the individuals that were involved.

As a corrective action to avoid future violations:

A description of the events and corrective actions taken were discussed in annual refresher training to radiographic personnel.

Full compliance was achieved on September 20, 2015.

As a point of contact, Steve Flickinger can be reached at Steve.Flickinger@janxndt.com, or office line (517) 531-8210 ext. 1012, or mobile (517) 206-2640.

Sincerely,

A handwritten signature in blue ink, appearing to read "Steve C. Flickinger".

Steven C. Flickinger
