Christopher J. Blasio, M.S. / RSO
National Aeronautics and Space Administration
John H. Glenn Research Center
21000 Brookpark Road
Mailstop 6-4
Cleveland, OH 44135

Dear Mr. Blasio:

Enclosed is Amendment 56 to your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 34-00507-16 in accordance with your request dated March 28, 2016.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the NRC, Region III office at 630-829-9887 so that we can provide appropriate corrections and answers.

At this time, the licensee has not requested approval of a decommissioning plan as defined in 30.36(g). In accordance with 10 CFR 30.36(g), the licensee is required to submit a decommissioning plan if the conditions of 30.36(g)(1) are met. If the licensee is unsure whether those conditions are met, the NRC encourages the licensee to gain further clarity concerning how your decommissioning process relates to NRC regulations.

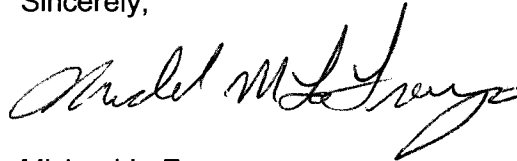

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(20)(iii).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with Title 10 of the *Code of Federal Regulations* Section 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www/nrc.gov/reading-rm/adams.html>.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael LaFranzo". The signature is fluid and cursive, with the first name "Michael" written in a larger, more prominent script than the last name "LaFranzo".

Michael LaFranzo
Senior Health Physicist
Materials Control, ISFSI and
Decommissioning Branch
