Subject: [External_Sender] RE: Verification of Prescribed Activity

The 29.1 mCi represents the **total** activity prescribed (activity to the lobe plus activity to the lung). The 25.49 mCi is the activity prescribed to the lobe.

Dr. Smith,

Thanks for your quick response. I reviewed your letter of June 28, 2016 and the two attachments and see why we are confused. Attachment 1 (written by you?) indicates a prescribed dose of 25.49 mCi while Attachment 2 (written by Dr. Unger) states a prescribed dose of 29.1 mCi. Do you have any idea why the discrepancy? We just want to be prepared should we need to explain to NRC HQ.

Regards,

Bob

Mr. Gallagher,

The prescribed activity was 25.49 mCi per the written directive.

Let me know if you have any additional questions.
