JAN 30 2017

Kelly C. Smith
SVP OHI Division President
Oakwood Hospital – Dearborn
18101 Oakwood Boulevard
Dearborn, MI 48123-2500

Dear Ms. Smith:

Enclosed is Amendment No. 118 to your NRC Material License No. 21-04515-01 in accordance with your request.

This amendment only adds authorization for Ronald J. Meade, M.D.

We are awaiting additional information supporting your request to change the Radiation Safety Officer, as noted in the letter dated January 6, 2017, signed by you. Please submit that information as additional information to control number 592803 and mark it to my attention.

We will be expecting this information in our offices by February 17, 2017. If you need to make alternative response arrangements, please contact me.

Please only transmit one complete copy via fax (best method - 630-515-1078); or regular mail (next best method -see address above); or scanned PDF/email (colleen.casey@nrc.gov). Do not send us duplicate response copies, or copies by different means of transmission.

Please note that we have reformatted your license in our new Web Based Licensing (WBL) system. As a result, changes to your license have been made so please review the enclosed document carefully and be sure that you understand all conditions.

If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

We deleted Condition No. 17 from your license, as it appeared on Amendment No. 117, in favor of referencing 10 CFR Part 71 in the Preamble at the top of page one of your license.

We deleted Condition No. 14 from your license, as it appeared on Amendment No. 117, because the regulations in 10 CFR 35.633 cover the same requirement.

If you have any other questions concerning this amendment please contact me at either (630) 829-9841 or (800) 522-3025, ext. 9841. My fax number is 630-515-1078.

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

K. Smith

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.
