**Probabilistic Flood Hazard Assessment (PFHA) Research Workshop**

From January 23 through 25, 2017, RES staff, in cooperation with NRC's Office of New Reactors (NRO) External Hazards Center of Expertise staff and the Electric Power Research Institute (EPRI), conducted a public workshop on Probabilistic Flood Hazard Assessment (PFHA) research. The purpose of the workshop was to inform internal NRC stakeholders, partner Federal agencies, industry, and the general public about PFHA research being conducted by RES in response to a user need from NRO. RES is collaborating with EPRI on research in this area under a NRC-EPRI Memorandum of Understanding on Collaborative Nuclear Safety Research. The workshop included presentations on research needs and priorities by NRO and NRR staff, EPRI, and industry. Technical presentations by RES staff, NRC contractors and EPRI covered research on climate, precipitation, riverine and coastal flood hazard assessment, as well as reliability of flood protection and flood mitigation. The workshop included a panel discussion on PFHA research activities by partner agencies NOAA/National Weather Service, U.S. Army Corps of Engineers, Tennessee Valley Authority, U.S. Department of Energy and the French Institute for Radiation Protection and Nuclear Safety. About 80 workshop attendees participated both in person and remotely via GoToWebinar. The workshop presentations and discussions will be available as a NUREG/CP proceedings.
