Subject: [External_Sender] Waste Site

I live in Andrews, Texas. Today a post was made in a local group on Facebook. It was in reference to high risk radio-active waste to be disposed of by Waste Control Specialities. I as well as several people just learned of this move by WCS. I ask the question about the water in the area and one citizen informed us water was not located in the area.

The questions presented were responded to be "research it". Do you have any factual information concerning the waste as well as the actual water tables in the area. I remember in the 1990 the aquifer was tested and contained pesticides. The aquifer is critical to the farming communities north of Andrews and if I understand correctly continues to Dakota. Do you know if those community members have been informed?

Any information you have would be beneficial.

Thank you,

Sherri Hudgens Caddell
