Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Gentlemen:

In response to your December 9, 1977 letter concerning suppression pool temperature transient analysis for Nine Mile Point Unit 1, our letter of December 23, 1977 indicated that Niagara Mohawk would submit items which require clarification by January 6, 1978.

Due to the generic issues involved, General Electric, our reactor supplier, is unable to do this at this time. By February 15, 1978, Niagara Mohawk will identify any items which require clarification in addition to supplying an action plan describing the specific analysis to be performed and its appropriate schedule.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION
