Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

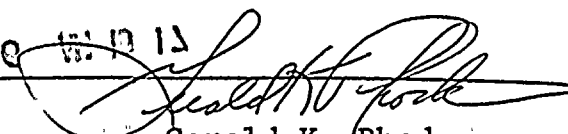

Dear Mr. Stello:

My October 4, 1976 letter indicated that design information regarding recirculation pump trip for Unit 1 would be submitted in June 1977. We understand that the Nuclear Regulatory Commission is planning to provide guidance in August 1977 for recirculation pump trip and the Anticipated Transients Without Scram issue.

In order to incorporate this guidance, we have revised our schedule for finalizing the design for recirculation pump trip for Unit 1. As indicated in the above-mentioned letter, a recirculation pump trip is planned for installation during the next refueling outage, presently scheduled for Fall, 1978. Six months prior to this installation, detailed design information and appropriate Technical Specification changes for the recirculation pump trip feature will be provided.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION
