NIAGARA MOHAWK POWER CORPORATION

NIAGARA  MOHAWK

300 ERIE BOULEVARD WEST
SYRACUSE, N.Y. 13202

November 3, 1976

Director of Nuclear Reactor Regulation
Attn: Mr. George Lear, Chief
Operating Reactors Branch #3
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Dear Mr. Lear:

During meetings with the Nuclear Regulatory Commission staff on July 7, 1976 and August 19, 1976, the Mark I Owners' Group presented its proposal for the Mark I Containment Long Term Program. The first task in this program was the development of the "Program Action Plan." This has been prepared by General Electric and submitted to the Commission by a letter from Mr. L. J. Sobon (General Electric) to Mr. V. Stello (Commission) dated October 29, 1976. We have reviewed this Action Plan and conclude that it will generate the information necessary to complete the evaluation for Nine Mile Point Unit 1.

This Program Action Plan has been prepared as an integrated source of information in terms of specific tasks, objectives, and activity scheduling that will lead to the generation of a Mark I Load Definition Report (LDR). This Action Plan contains descriptions of the tasks outlined for the Nuclear Regulatory Commission staff at the July and August meetings. Also, consideration is being given to a full-scale two-dimensional steam test in response to Mr. K. R. Goller's (Commission) September 19, 1976 letter to Mr. D. Galle (Chairman, Mark I Owners' Group). This consideration includes an assessment of the ability to obtain representative data from other sources, including reduced scale testing. The Program Action Plan report is structured so that it can be periodically updated to reflect the precise direction or emphasis of the overall program such as load mitigation versus structural modifications.

STATUS:

As a member of the Mark I Owners' Group, we have directed General Electric to proceed with the activities as defined in the Program Action Plan and to perform the test facility design and/or test planning for tasks which have tentative completion dates indicated. The Load Definition Report (LDR) that will be generated from this program will be utilized to complete the evaluation of Nine Mile Point Unit 1. We will be actively involved during the program so that our plant unique evaluation can be completed and structural modifications, if required, can be implemented at the earliest practical opportunity. We expect to be able to document the final evaluation report within three months after the Mark I Load Definition Report is issued by the Mark I Owners' Group.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

R. R. Schneider

Vice President - Electric Production
