Re: Nine Mile Point Unit 2
Docket No. 50-410

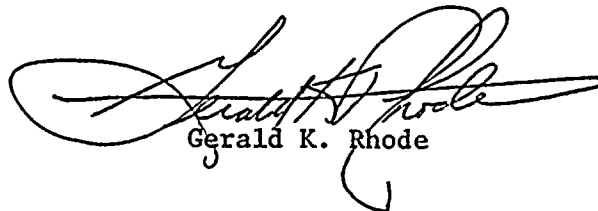

Dear Sir:

Mr. Varga's November 25, 1977 letter requested a plan to resolve the potential problems with the relief valve circuit control for Nine Mile Point Unit 2. My November 17, 1977 letter to Mr. Grier indicated that this design is being evaluated by the Mark II Containment Owners and the General Electric Company. Additionally, we have discussed this matter with our architect engineer.

The potential problems with relief valve "second pop" will be evaluated in conjunction with the Mark II Containment Owners Group evaluations. The loads associated with this phenomenon will be identified and their impacts assessed. Design changes, if any, will be described in Revision 2 to the "Plant Design Assessment for Safety Relief Valve and Loss of Coolant Accident Loads."

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION
