February 7, 1977

Director of Nuclear Reactor Regulation
Attn: Mr. Benard C. Rusche, Director
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Re: Nine Mile Point Unit 2
Docket No. 50-410

Dear Mr. Rusche:

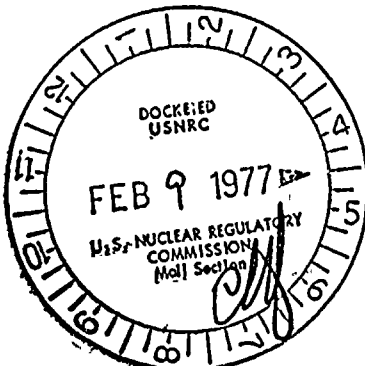

Mr. Varga's January 14, 1977 letter requested a schedule for response to certain questions regarding the Nine Mile Point Unit 2 Containment dynamic loads. We have reviewed this matter with our Architect Engineer and Nuclear Steam Supply Vendor. Based on this review, we propose to reschedule Revision 1 of the "Plant Design Assessment for Safety Relief Valve and Loss of Coolant Accident Loads."

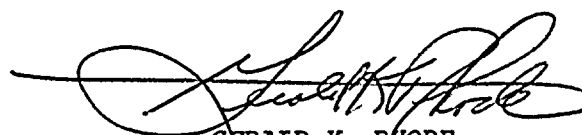

Revision 1 was previously scheduled to be submitted in June, 1977, as indicated in our September 1, 1976 letter to Mr. Vassallo. Revision 1 is now scheduled to be submitted in November, 1977, and will incorporate the information requested in the January 14, 1977 letter and Revision 3 to the "Mark II Containment Dynamic Forcing Functions Report."

Please note that requests 020.62(1) and 020.63(2) are addressed in Section 10 of the Unit 2 "Plant Design Assessment for Safety Relief Valve and Loss of Coolant Accident Loads" Report which was submitted June 30, 1976.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

GERALD K. RHODE
Vice President - Engineering
