AUG 14 1975

Docket No. 50-220

Niagara Mohawk Power Corporation
 ATTN: Mr. Gerald K. Rhode
 Vice President - Engineering
 300 Erie Boulevard West
 Syracuse, New York 13202

Gentlemen:

During our review of the material you have submitted for the GETAB-Based Technical Specifications, we have found that the analysis for Rod Withdrawal Error Transient has not been included. This analysis determines the rod block setting to assure that the MCPR safety limit is not exceeded.

Since the GETAB and Appendix K reviews are being performed concurrently, you are requested to provide the staff with your analysis of the Rod Withdrawal Error Transient and the appropriate rod block setpoints in support of your proposed GETAB Technical Specifications. To maintain our review schedule, you are requested to submit this analysis by September 1, 1975.

This request for generic information was approved by GAO under a blanket clearance number B-180225 (R0072); this clearance expires July 31, 1977.

Sincerely,

151
 George Lear, Chief
 Operating Reactors Branch #3
 Division of Reactor Licensing
