Re: Nine Mile Point Unit 1
Docket No. 50-220

Dear Mr. Lear:

Your letter of April 17, 1975 requested information about suppression chamber loadings and relief valve discharge effects at Nine Mile Point Unit 1. The submittals listed below were in response to the concerns expressed in your letter.

- 1) Letter dated May 4, 1975 from Mr. G. K. Rhode to Mr. George Lear.
- 2) Letter dated June 13, 1975 from Mr. I. F. Stuart to Mr. R. L. Tedesco.
- 3) Letter dated June 26, 1975 from Mr. G. L. Gyorey to Mr. R. R. Maccary.
- 4) Letter dated July 8, 1975 from Mr. J. L. Embly to Mr. W. R. Butler.

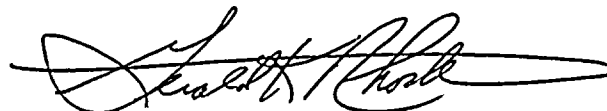

Pursuant to 10CFR50.54 (f), this additional information is being transmitted. We have reviewed information recently submitted by General Electric and find that it is applicable to the Nine Mile Point Unit 1 containment. General Electric submitted this information to the Nuclear Regulatory Commission in a letter dated July 31, 1975 from Mr. I. F. Stuart to Mr. A. Giambusso. The report summarizes their Mark I containment short and long term programs.

8315A-

The information included in the General Electric report demonstrates that continued operation of Nine Mile Point Unit 1 does not present an undue safety hazard to the public. This matter has been reviewed by the Nine Mile Point-James A. FitzPatrick Site Operations Review Committee and the Safety Review and Audit Board which concur in this conclusion.

Sincerely,

NIAGARA MOHAWK POWER CORPORATION
