Gentlemen:

We are interested in obtaining data from operating boiling water reactors on the noble gas and iodine activity in the reactor drywell during normal operation. Mr. R. Burns of your staff has advised us that such information may be available for Nine Mile Point Unit 1.

We request that you provide us this information in order that we may develop generic source terms for BWR's. Since we are now revising our source term models, a timely response to this request would be appreciated.

Sincerely,

George Lear, Chief
Operating Reactors Branch #3
Division of Reactor Licensing
