File Cy.

August 28, 1975

Mr. Donald F. Knuth, Director
Office of Inspection and Enforcement
United States Nuclear Regulatory Commission
Washington, D.C. 20545

Dear Mr. Knuth:

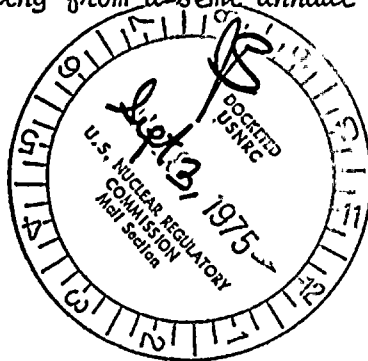

Nine Mile Point Nuclear Station Unit 1
Facility Operating License No. DPR-63
Docket No. 50-220

In conformance with Environmental Technical Specification 5.6.1 for Nine Mile Point Nuclear Station Unit 1, we are enclosing twenty (20) copies of the Semi-Annual Environmental Monitoring Report for radiological environmental monitoring. This report covers the period January 1, 1975 through June 30, 1975.

Under separate cover, we are sending three (3) copies of the Semi-Annual Environmental Monitoring Report for non-radiological environmental monitoring. Seventeen (17) additional copies will be provided by September 19, 1975.

We would call to your attention an apparent conflict between the specifications of Section 3.1, which require annual reporting of non-radiological environmental monitoring, and specification 5.6.1, which requires semi-annual reporting. Our "Application for Amendment to Technical Specifications" dated August 7, 1975 would resolve this apparent conflict by changing from a semi-annual to an annual Environmental Monitoring Report.

Very truly yours,

R.R. Schneider

R.R. Schneider
Vice President
Electric Operations
