Dear Dr. Morris:

Re: Niagara Mohawk Power Corporation
Docket No. 50-220

Regulatory

File Cy.

Niagara Mohawk Power Corporation hereby transmits three (3) originals and twenty-five (25) copies of a petition entitled, "Petition Requesting Amendment of License." Accompanying this petition and incorporated in it by reference are seventy (70) copies of a document entitled, "Technical Supplement to Petition to Increase Power Level."

Service of this petition and its accompanying supplement will be made upon the appropriate local officials. After such service is made, a Certificate of Service will be sent to you.

Very truly yours,

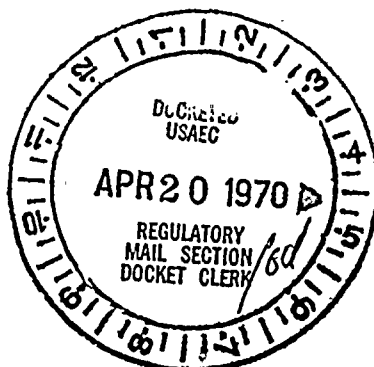

Niagara Mohawk Power Corporation

) Docket No. 50-220

Niagara Mohawk Power Corporation)

Petition Requesting

Amendment of License

Niagara Mohawk Power Corporation, Licensee in the above-captioned proceeding, hereby files its petition to amend its license in order to allow operation of its Nine Mile Point facility at a higher power level than the present license permits. In support of this petition, Licensee states as follows:

- (1) Licensee received on August 22, 1969, a provisional operating license (DPR-17) permitting it to operate its Nine Mile Point facility at 1538 MW_t.
- (2) At the time of the design and construction of the aforementioned facility, Niagara Mohawk had the components of the facility designed to accommodate operation of the facility at a power level higher than the power level presently authorized. In addition, the principal

1. The first part of the document
describes the general situation
of the country and the
population.

2. The second part of the document
describes the economic situation
of the country and the
resources.

3. The third part of the document
describes the social situation
of the country and the
education.

4. The fourth part of the document
describes the political situation
of the country and the
government.

5. The fifth part of the document
describes the cultural situation
of the country and the
traditions.

6. The sixth part of the document
describes the environmental situation
of the country and the
climate.

7. The seventh part of the document
describes the international situation
of the country and the
relations.

postulated accidents for the facility were also analyzed at a power level considerably higher than the power level presently authorized.

- (3) A document entitled, "Technical Supplement to Petition to Increase Power Level" accompanies this petition and is hereby incorporated by reference. This Supplement contains: (a) a description of minor changes to the facility, none of which reflects upon the capability of the facility; (b) a reanalysis of postulated accidents at the higher power level; (c) proposed revised technical specifications; (d) a summary of the initial startup of the facility, and (e) other relevant technical material.

WHEREFORE, Licensee prays that its operating license

be amended to allow operation of its Nine Mile Point facility at
.1850 MW_t.
