Docket No. 50-220

Niagara Mohawk Power Corporation
ATTN: Mr. Gerald K. Rhode
Vice President - Engineering
300 Erie Boulevard West
Syracuse, New York 13202

Gentlemen:

RE: NINE MILE POINT UNIT NO. 1

In our letter to you of February, 1976, providing guidance on implementing the requirements of Appendix I to 10 CFR Part 50, we indicated that the staff was preparing additional guidance regarding the formulation of Technical Specifications to implement Section V.B.2 of Appendix I. In this regard we have attached guidance on the preparation of your proposed Technical Specifications. It should be noted that these draft Technical Specifications will require modification to incorporate plant specific information. Additionally, due to the draft nature of these Technical Specifications there are certain areas which have already been identified by the staff for further study and possible modification. These areas are listed in the "Forward" to the attached "Draft Model Technical Specifications".

We would be pleased to meet with you after the June 4, 1976 submittal date to discuss your methods of evaluation to show conformance with Appendix I and your proposed Technical Specifications for the purpose of keeping releases of radioactive materials in effluents as low as reasonably achievable.

Sincerely,

George Lear, Chief
Operating Reactors Branch #3
Division of Operating Reactors

Enclosure:
Draft Model Technical Specifications
for Boiling Water Reactors

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is responsible for the study. The investigator must first identify the problem that is being investigated. This is done by the investigator who is responsible for the study. The investigator must first identify the problem that is being investigated. This is done by the investigator who is responsible for the study.

1. The first of these is the fact that the United States has a large and growing population of people who are not citizens of the United States. This is a result of the large number of immigrants who have come to the United States in recent years, and the fact that many of these immigrants are not naturalized citizens.
