REC-1

NIAGARA MOHAWK POWER CORPORATION

NIAGARA  MOHAWK

300 ERIE BOULEVARD, WEST
SYRACUSE, N. Y. 13202

March 27, 1975

Mr. George Lear, Chief
Operating Reactors Branch #3
Division of Reactor Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Re: Nine Mile Point Unit 1
Docket No. 50-220

Dear Mr. Lear:

This letter is in response to your February 15, 1975 correspondence concerning the steam quenching vibration phenomenon.

Technical Specifications 3.3.2 and 4.3.2, as presently incorporated in the operating license for Nine Mile Point Unit 1, provide adequate limits for suppression chamber water temperature. These specifications include the provision that reactor temperature be brought below 215 F within ten hours if suppression chamber water temperature limits are exceeded. Surveillance requirements for water temperature and suppression chamber integrity are also provided. In addition to these specifications, operating procedures require a visual inspection of the suppression chamber in the unlikely event that a relief valve should fail to reseal normally.

3411

3411

Mr. George Lear
U. S. Nuclear Regulatory Commission

Page Two
March 27, 1975

We are presently investigating whether or not new requirements, in addition to those contained in our February 15, 1974 submittal, may be desirable to ensure suppression chamber integrity. The results of this investigation will be submitted by May 30, 1975.

Very truly yours,

Gerald K. Rhode
Vice President-Engineering
