NIAGARA MOHAWK POWER CORPORATION

NIAGARA  MOHAWK

300 ERIE BOULEVARD WEST  
SYRACUSE, N. Y. 13202

April 22, 1974

Mr. Dennis L. Ziemann, Chief  
Operating Reactors Branch #2  
Directorate of Licensing  
United States Atomic Energy Commission  
Washington, D. C. 20545

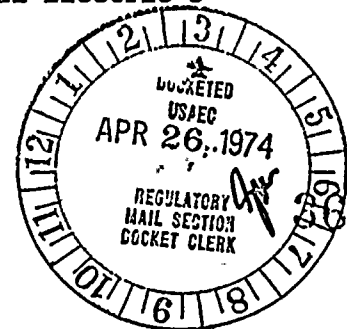

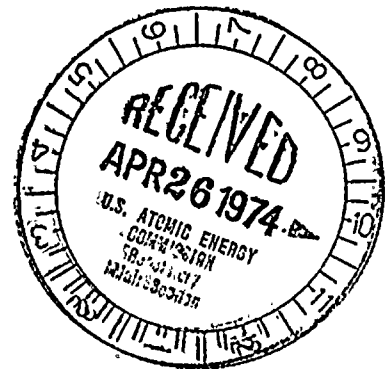

Dear Mr. Ziemann:

Re: Nine Mile Point Unit 1  
Docket No. 50-220

Your letter dated March 25, 1974 requested further information concerning "Part 2 - Proprietary Response" attached to our letter of January 15, 1974. Based on a request made by the General Electric Company, we requested proprietary treatment of that portion of the response.

General Electric requested that the information contained in Supplements B and C to the Nine Mile Point Unit 1 reload license submittal be withheld from public disclosure. This information is available only on a 'need to know' basis to General Electric employees. It has not been released outside the company except through limited releases designated as proprietary and strictly controlling its use. For example, the manufacturing specifications and tolerances shown are based on extensive experience and experimental data gained at General Electric's expense. Public release could allow competitors to duplicate all or part of the fuel without similar expense. Public disclosure of the getter characteristics would substantially decrease the commercial advantage which General Electric has developed in this area at its considerable expense. The neutron fluxes and fuel rod pressures have been determined from proprietary models developed at General Electric's expense.
