

AUG 21 1973

Docket No. 50-220

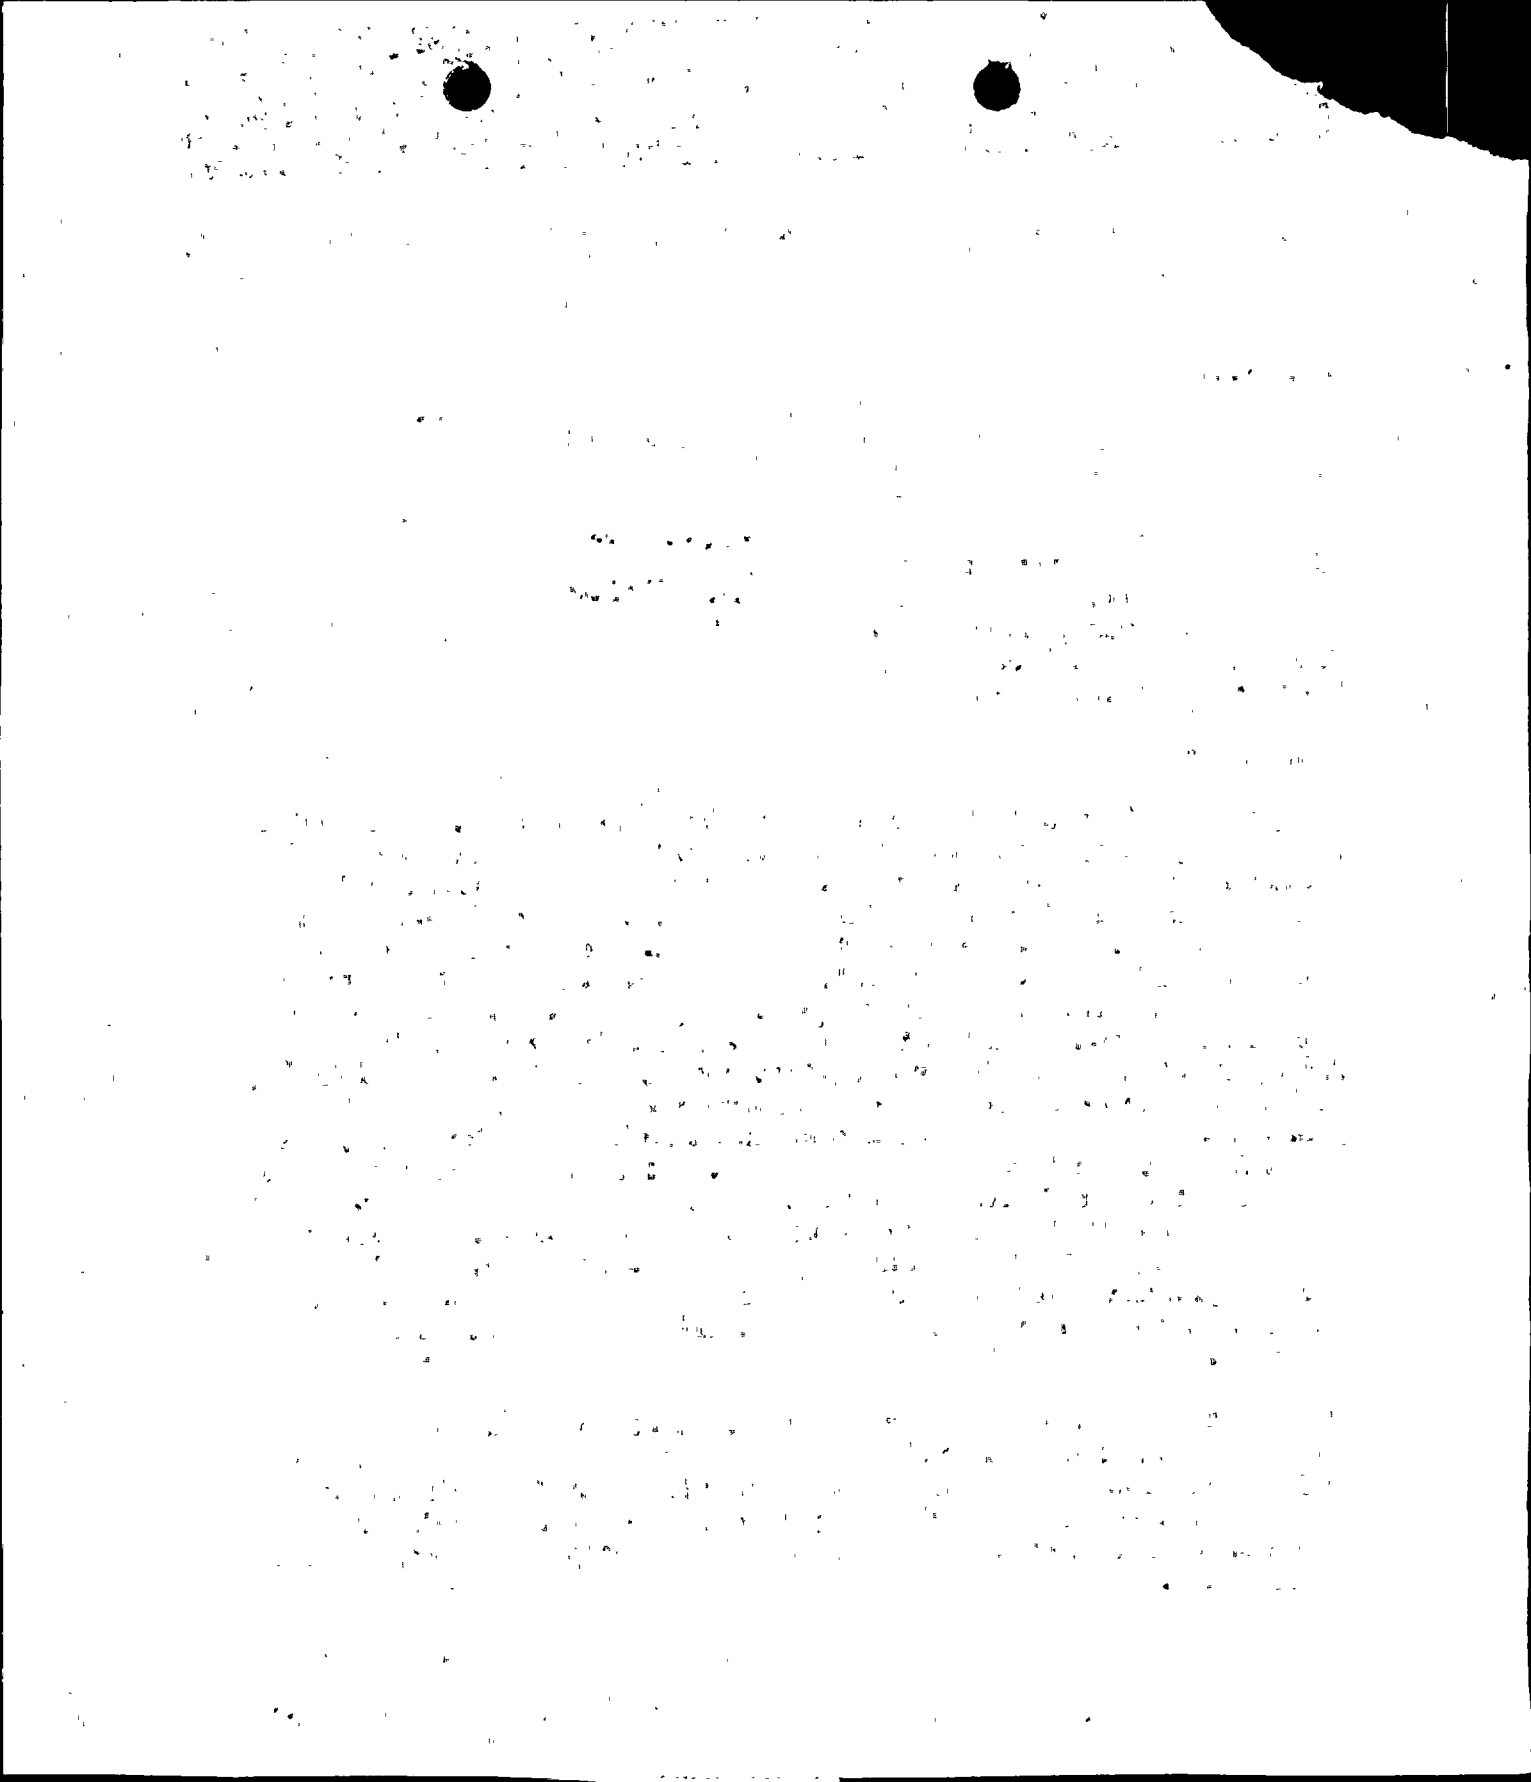

Niagara Mohawk Power Corporation
ATTN: Mr. Philip D. Raymond
Vice President - Engineering
300 Erie Boulevard West
Syracuse, New York 13202

Gentlemen:

The purpose of this letter is to establish a schedule for our review of your application notarized June 27, 1972, for conversion of Provisional Operating License No. DPR-17 to a full-term operating license for your Nine Mile Point Nuclear Station Unit 1 located in the Town of Scriba, Oswego County, New York. We have evaluated our workload, and based on this evaluation we have targeted the issuance of our Safety Evaluation Report for June 28, 1974. The issuance of our Final Environmental Statement is targeted for December 7, 1973. A summary of the more important milestones involved in the safety evaluation are enclosed for your information and review. At the present time, we do not have intervention indicated; therefore, our schedule does not include hearing dates. It should be realized that the indicated dates are target milestones which may require some changes as the review process proceeds. For example, if a public hearing on the matter of issuance of a full-term operating license becomes probable, the schedule will be revised to accommodate it. We will advise you by letter of any significant changes to the schedule.

Many of the milestones require specific input, preparation, or participation from you, such as responses to questions, ACRS meetings, and responses to public and agency comments. For this reason, we believe that you should critically review the dates associated with these important milestones and notify us promptly if you cannot meet these dates.

122

AUG 21 1973

After you have reviewed these milestones and associated dates, if you believe the dates should be adjusted, please discuss the matter with us so that the appropriate changes can be made and a suitable schedule developed.

Sincerely,

Original Signed By,

A. Giambusso

A. Giambusso, Deputy Director
for Reactor Projects
Directorate of Licensing
