Subject: NRC Notification of State of Florida Regarding St. Lucie License Amendment - Increase the Unit 2 Emergency Diesel Engine Mounted Fuel Tank Minimum Volume

Good Morning Ms. Becker,

As a follow-up to my phone message this morning, the U.S. Nuclear Regulatory Commission (NRC) is about to issue a license amendment for the St. Lucie Nuclear Plant, Unit 2. In accordance with Title 10 of the Code of Federal Regulations, Section 50.91(b), I am notifying you of the proposed issuance of this amendment.

Please reply if the State of Florida has comments on the following licensing action submitted to the NRC by Florida Power & Light Company, et al. (the licensee): "License Amendment Request EDG Day Tank Fuel Volume Change" dated June 21, 2016 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML16190A118), as supplemented by a letter dated December 5, 2016 (ADAMS ML16342C570).

The associated proposed no significant hazards consideration for this amendment request was published in the Federal Register on August 2, 2016 (81 FR 50733).

Your response is requested by February 3, 2017. If you have any questions, please call or e-mail me.

Thanks,

Perry Buckberg
