**Date:** Wednesday, January 25, 2017 7:02:16 PM

---

Marlayna,

As we discussed during Tuesday's call, the Cyber Milestone Extension LAR approval has an issue we believe needs to be evaluated and possibly corrected (via errata?). The statement (see below) is not true for SONGS and was different than the information we presented in our submittal.

On page 7 of the SE, Section 3.2 in the last paragraph, #3 indicates "the completion of the cyber remediation of the Plant Security System." It should be "the completion of the cyber remediation of the Spent Fuel Pool Cooling System" in accordance with the description in our letter request. [Note: This is also stated in the first paragraph of Section 3.4.]

Let me know if you have any questions. Thanks

Jim
