LISLE, IL 60532-4352

FEB 03 2017

David Hitt
Radiation Safety Officer
ESSROC Cement Corporation
Highway 31
Speed, IN 47172

Dear Mr. Hitt:

Enclosed is Amendment No. 8 to your NRC Material License No. 13-26609-01 in accordance with your request. Please note that, based on the new licensing process your license format and the following License Conditions were updated: Condition 10 regarding the address of the location of use, Condition 12 regarding the qualification for the users, Condition 13 regarding the sealed source leak test requirement, Condition 15 regarding the licensed material inventory requirement, Condition 18 regarding the operating condition for devices containing licensed material, and Conditions 19 and 20 regarding the operations of the on-off mechanism (shutter). Also, Items 7, 8, and 9 regarding your licensed materials were updated based on the information provided in your application dated November 5, 2014 and the Sealed Source and Device Registry for Thermo Electron Corporation Model CBX (CA-0305-D-113-S). In addition, Condition 24 regarding the transportation requirement in your previous amendment was deleted because the requirement is already specified in the regulations.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with Title 10 Code of Federal Regulations 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Frank P. D. Tran
